---

This is not the first time she is enquiring about her property. I think Brenda or someone told her that her property is not part of Wilcox Oil site and has never been.

Philip,

Ms. Edson contacted Bart Canales in connection with the Wilcox Oil Site in Oklahoma. She provided us with her property information and was inquiring if her property would be involved in the Superfund response at Wilcox Oil. Based on the information I've gathered her property is north of the Wilcox Site and is actually on what is referred to the Ohio Oil site. She informed me that she purchased her property in 2009. I told her that her property is not on the Wilcox Site and would not be involved in any Superfund Response. I told her that you may be better able to explain to her the current situation with her property and the basis for the reason it was not listed. I gave her your phone number. Give me a call if you have any questions.

Thanks

Lance,

I was wondering if you ever received the abstract information that I had mailed to you a few weeks back? Have there been any updates concerning Superfund involvement? Any information that you can supply would be greatly appreciated.

Thank You,
